BILL NO. S-85-07-10

SPECIAL ORDINANCE NO. S-140-85

AN ORDINANCE approving Change Order No. 1, Res. #404-84, Winchester Road Sanitary Sewer, with All Star Construction & Excavating, in connection with the Board of Public Works and Safety.

NOW, THEREFORE, BE IT ORDAINED BY THE COMMON COUNCIL OF THE CITY OF FORT WAYNE, INDIANA:

SECTION 1. That Change Order No. 1, Res. #404-84, Winchester Road Sanitary Sewer, with All Star Construction & Excavating, in connection with the Board of Public Works and Safety, for:

Change order #1 for Res. #404-84, Winchester Road Sanitary Sewer is necessary because of the following:

Bid Item #7 - 6" Building Sewer Extension - Due to alluvial and acquifer soil conditions, selected building sewers were extended beyond the proposed planned limits in order to protect existing utilities in particular, an existing 12" water main.

Bid Items #8 (#53/73 Special Backfill - #9 Special Back Fill - #10 Base Stabilization), due to alluvial soil and pockets of water bearing gravel, it became evident during construction that the existing road (Riverway Drive) was in danger of falling within the trench area. Due to the location of work to be performed and amount of said ground water, the WPC Engineering Department ordered the contractor to "overcut" the trench and sump pump out the water in lieu of very expensive well points. This required additional gravel and #53 stone for backfilling and restoration. Due to the above noted ground water, "base stabilization" for the pipe was required;

involving a net increase of Eight Thousand Three Hundred Forty-Eight and 89/100 Dollars ($8,348.89), all as more particularly set forth in the specifications, and which is on file with the Office of the Board of Public Works and Safety, and is by re-

ference incorporated herein, made a part hereof and is hereby in all things ratified, confirmed and approved.

SECTION 2. That this Ordinance shall be in full force and effect from and after its passage and any and all necessary approval by the Mayor.

Winchester Road Sanitary Sewer
Resolution 404-1984 - B.O. 89-1984
Justification for Change Order #1

Bid Item #7

Due to alluvial and acquifer soil conditions, selected building sewers were extended beyond the proposed planned limits in order to protect existing utilities, in particular, an existing 12" water main.

Bid Items #8, 9 and 10

Due to alluvial soil and pockets of water bearing gravel, it became evident during construction that the existing road (Riverway Drive) was in danger of falling within the trench area. Due to the location of work to be performed and amount of said ground water, the WPC Engineering Dpeartment ordered the contractor to "overcut" the trench and sump pump out the water in lieu of very expensive well points. This required additional gravel and #53 stone for backfilling and restoration. Due to the above noted ground water, "base stabilization" for the pipe was required.
